

SOLAR

IR 80

INTERNAL APPLICATION

Transparent blue - Ceramic

INFRARED REJECTION 82%

The IR 80 infrared protection film - with its ceramic technology - has been designed to be applied to all types of glazing in a way that reduces heat, while maintaining transparency and brightness on both sides of the glazing.

Application Method

The glass surface has to be free from dust, grease or other contaminants to be glued on.

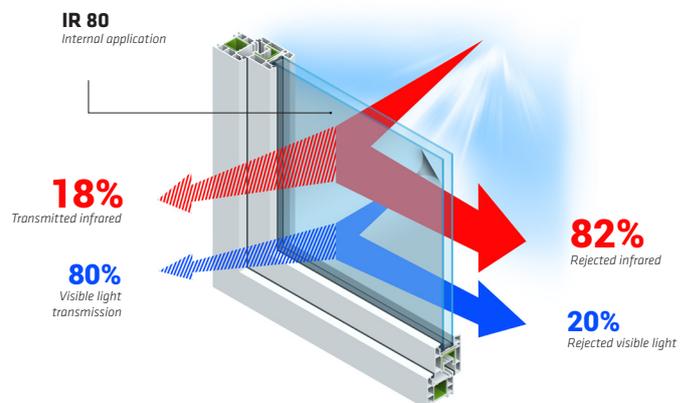

Production and standards

In order to constantly improve our production we may change a product color and manufacturing process without prior notice. Before applying our products we recommend that our users ensure that the film is suitable for the intended use and comply with current standards.

To meet high levels of requirements, we do not recommend to mix different production batches.

INFORMATION

INFRARED REJECTION:	82%
VISIBLE LIGHT TRANSMISSION:	80%
UV TRANSMISSION:	1%
TOTAL REJECTED SOLAR ENERGY:	62%
SOLAR FACTOR G:	38%
MATERIAL:	PET 46 microns
ADHESIVE:	Acrylic
LINER:	Pet liner 23 microns
THICKNESS:	75 microns
APPLICATION FACE:	Internal
COLOR:	Transparent blue
APPLICATION T°:	min, + 5°C
FIRE RATING:	B-S1, D0
STANDARDS:	EUROCLASSES
GUARANTEE:	10 years
WIDTH:	1,52 m
LENGTH:	2,5 / 5 / 10 / 30 m

Application method

Application video

Use: Réfectiv window films are designed for use on any type of clear normal glass

Maintenance after 30 days: with usual cleaning solutions (non-abrasive, without ammonia...). Cleaning products that may scratch the film should be avoided.

Stockage: 2 years from delivery. This film should be kept away from excessive humidity and sun rays, at temperatures below 38°C.
