

MIRROR

MIR 900

INSIDE APPLICATION

See without being seen

PERFECT MIRROR ON BOTH SIDES

OPAQUE MIRROR 100%

Our MIR 900 film transforms your glass surfaces into a total reflective screen. Light does not pass through creating a totally opaque wall. Our film provides the same results as a mirror, in addition to answering your decoratives and privacy wise needs.

Durability : from 12 to 15 years for vertical application in central Europe.

Use : Réflectiv window films are designed for use on any type of clear normal glass.

Maintenance after 30 days : with usual cleaning solutions (non-abrasive, without ammonia...). Cleaning products that may scratch the film should be avoided.

Storage : 2 years from delivery. This film should be kept away from excessive humidity and sun rays, at temperatures below 38°C.

In order to constantly improve our production we may change a product colour and manufacturing process without prior notice.

INFORMATION

MATERIAL:	Crystal pet
ADHESIVE:	Acrylic polymer
LINER:	Pet 23 microns
THICKNESS:	80 microns
VISIBLE LIGHT TRANSMISSION:	0%
UVA TRANSMISSION:	0%
APPLICATION SIDE :	Inside
THERMAL RESISTANCE:	De -20°C À 80°C
APPLICATION T° :	...min, + 5°C
FIRE RATINGS:	🔥 B-S1, D0
STANDARDS :	Scratch resistance > 2h
WARRANTY:	5 Years*

DIMENSIONS

1,52 x 2,5 m

1,52 x 5 m

1,52 x 10 m

1,52 x 30 m

*for glazing not exposed to the sun

Application's instructions

Application's video

Application Method

The glass surface to be glued on has to be free from dust, grease or other contaminants. Some specific materials such as polycarbonate can cause air bubble problems. Therefore, a compatibility test is recommended. For more precision we recommend to refer back to the application table.

Production and standards

In order to constantly improve our production we may change a product colour and manufacturing process without prior notice. Before applying our products we recommend that our users ensure that the film is suitable for the intended use and comply with current standards.
